Q10 - What did this TA do that was most helpful to your learning experience in the course?

What did this TA do that was most helpful to your learning experience in th...

She provided lots of example problems from past exams and prelims and worked them in the recitation sessions. That bridged the gap between the lectures and doing well in the class.

Reply back to my email really fast even in late at night. Very professiontal

In the recitation, the TA well summarized the content we learned and provided some specific question examples for us, which helps my homework a lot.

When she gave the recitation based on her judgment, I think she explained better than when she based it on pools.

Q11 - What might the TA do to improve your learning experience in the course?

What might the TA do to improve your learning experience in the course?

Feedback is important to students. Problem sets should be graded within a week. Four days before the Production Exam, we have not gotten anything back in a month, including three of the five problem sets. I think the recitation could have also been used to make connections or go deeper within the course, the way Ling did in econometrics. Monique showed little interest in intuition or application. Her approach was very mechanical. She didn't even seem to like microeconomics or math very much and commented at times about not using the material after passing the prelim. I honestly wonder what she is interested in.

Q13 - Any additional comments you'd like to share?

Any additional comments you'd like to share?

Serving as TA for PhD Microeconomics is very demanding, perhaps too demanding for a second-year student. First, I don't think it was appropriate for Paul Glewwe to ask Monique to write the problem sets for the course. That is his responsibility as the instructor. Terry's setup was much better: with a bank of problems and solutions, some of which were assigned and others were practice for the exams. Second, Monique also commented about the demands of the second year -- classes, Second Year Paper, etc. Previous TA's were third or fourth year students with a stronger background and less time pressure. I think the department should consider assigning a third or fourth year student in the future.
